DETAILED ACTION

1. The amendment filed March 1, 2006 is entered and claims 6-8, 14, 15, 19, 22, and 23 are pending.

Allowable Subject Matter

2. Claims 6-8, 14, 15, 19, 22, and 23 are allowed.
3. The following is an examiner's statement of reasons for allowance: the claimed invention is directed to a display apparatus for executing a display corresponding to display data to be inputted from the outside.

Independent claim 6 identifies a uniquely distinct feature "a pulse controlling unit for outputting a signal in correspondence with a comparison result by said data comparing unit, said signal controlling said time ratio of said 1st light-emission luminance in said one period".

Independent claim 14 identifies a uniquely distinct feature "a tone controlling circuit for updating a set value in at least 1 specified tone position in accordance with said luminance distribution data, and for determining a tone characteristic between said updated respective set values on a 1-frame basis with the use of a predetermined arithmetic-calculation formula".

Independent claim 19 identifies a uniquely distinct feature "wherein said light-source controlling circuit controls said light-source light-emission time so that a light-source light-emission time for displaying image data becomes longer than a light-source

light-emission time for displaying relatively darker image data, said image data being relatively brighter than predetermined image data”.

The closest arts, Iba et al and Seo as discussed in the previous Office Action, either singularly or in combination, fail to anticipate or render obvious the above limitations obvious.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
